Microsoft Fabric Platform

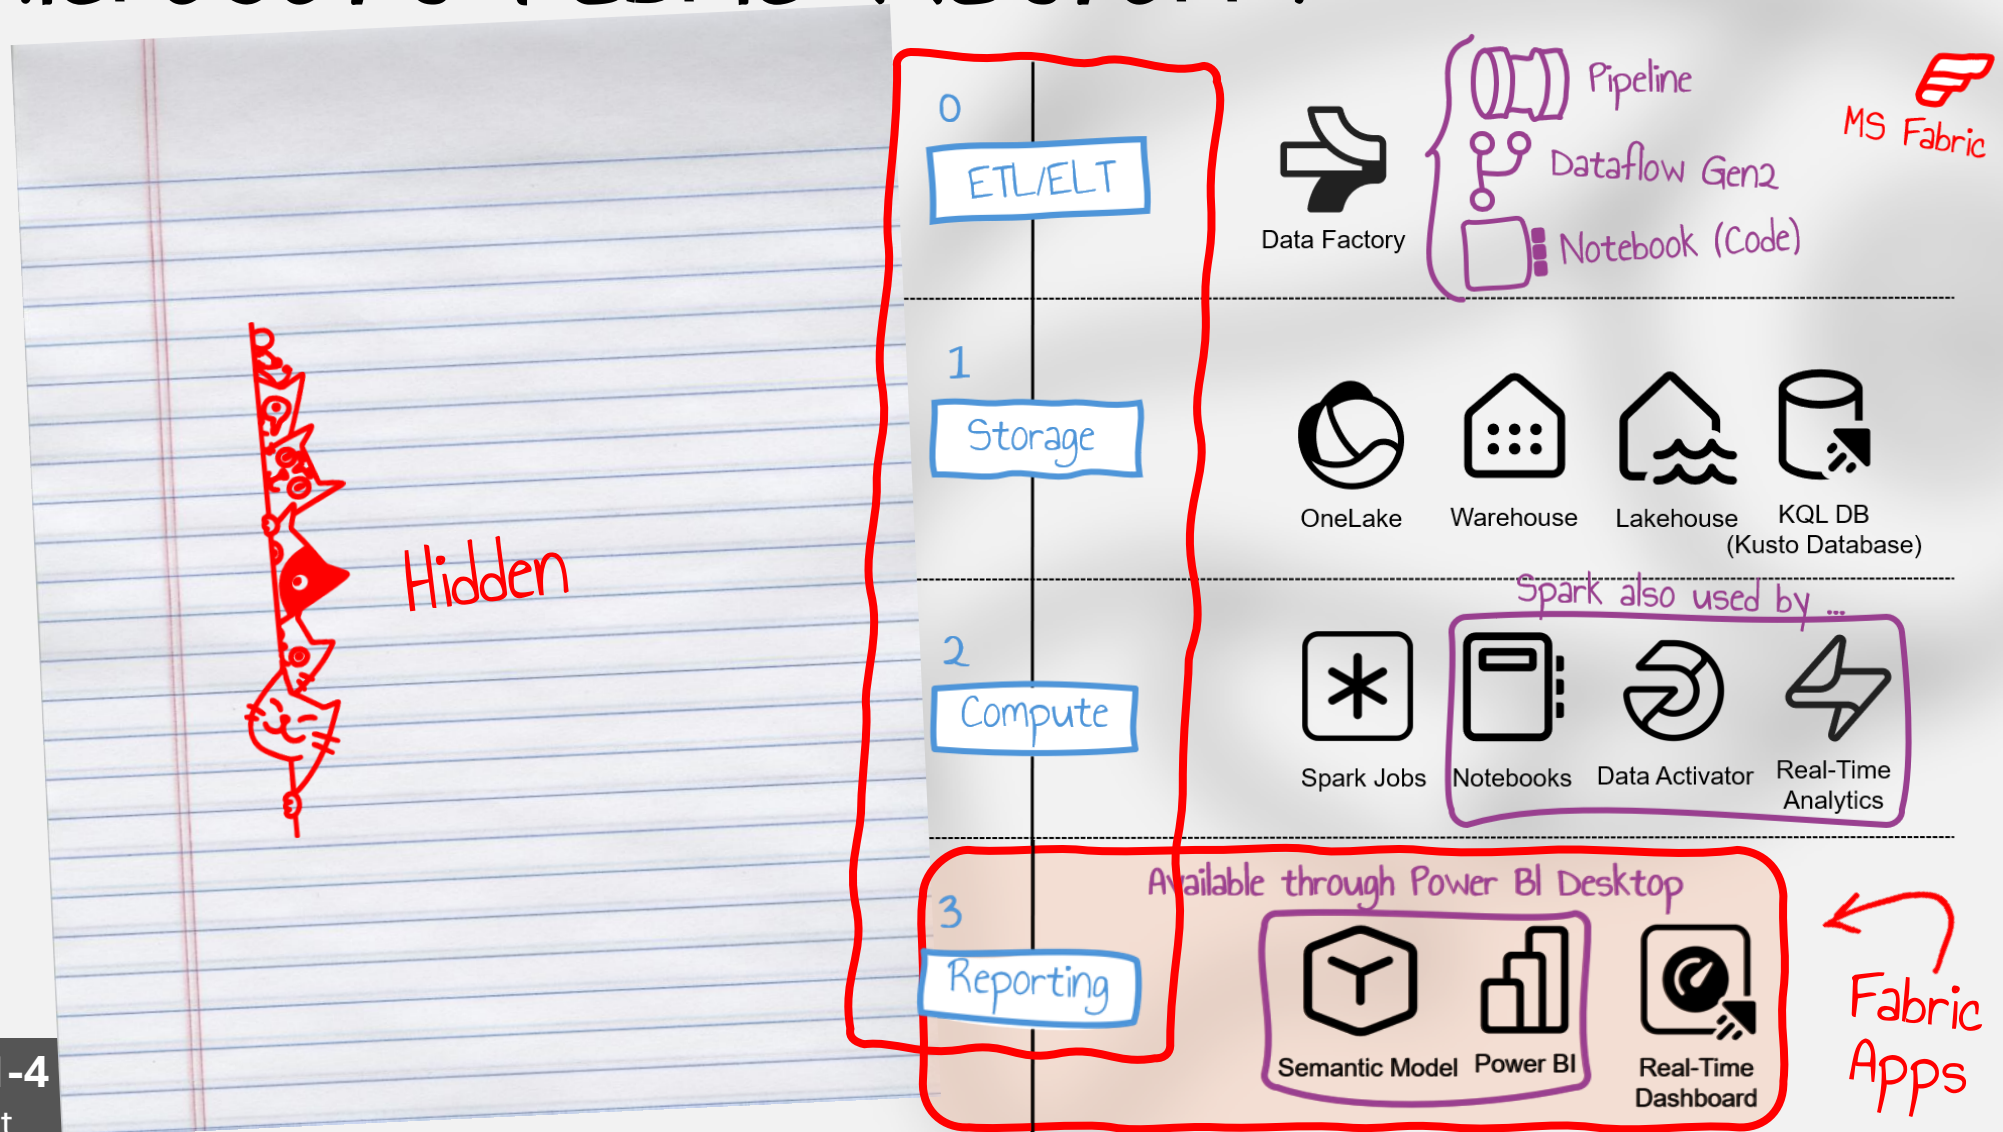

Figure 1-4
Concept

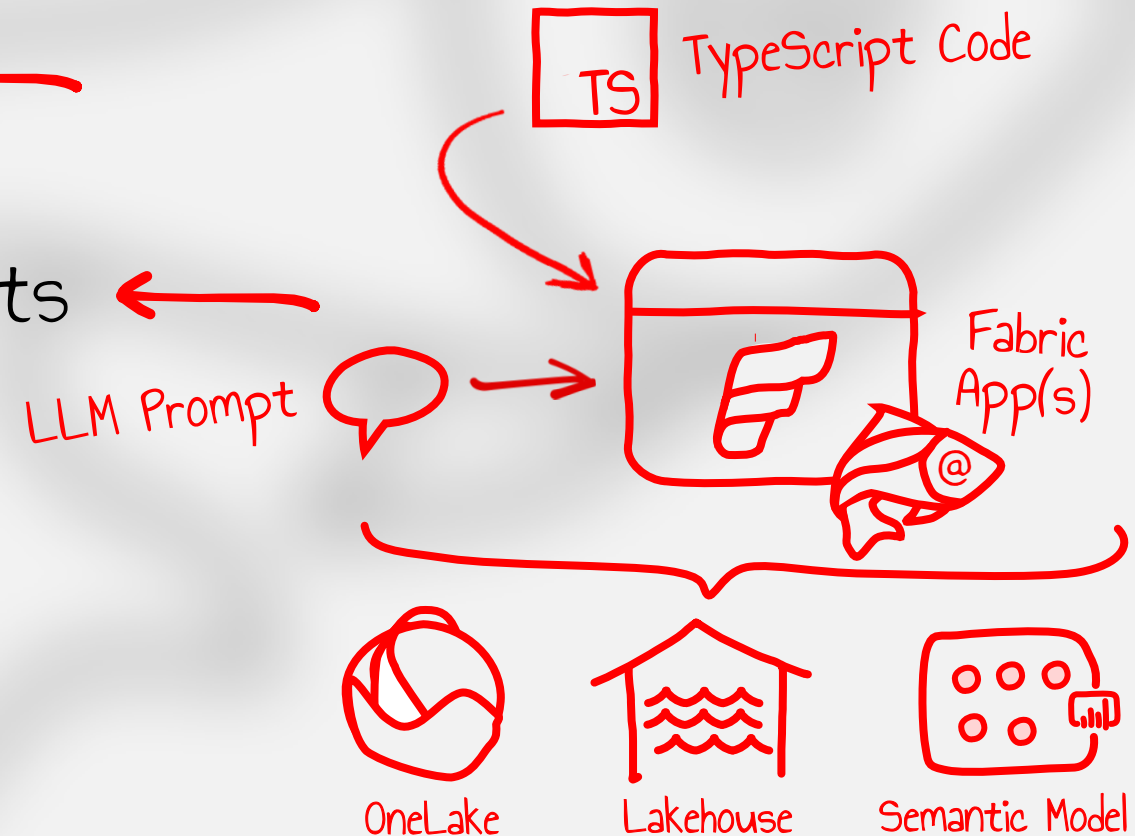

#Why #What #How

Fabric Apps

1. Created using TypeScript code with LLM prompt (AI) ←

2. Use Rayfin under the hood ←

3. Surface Microsoft Fabric artifacts ←

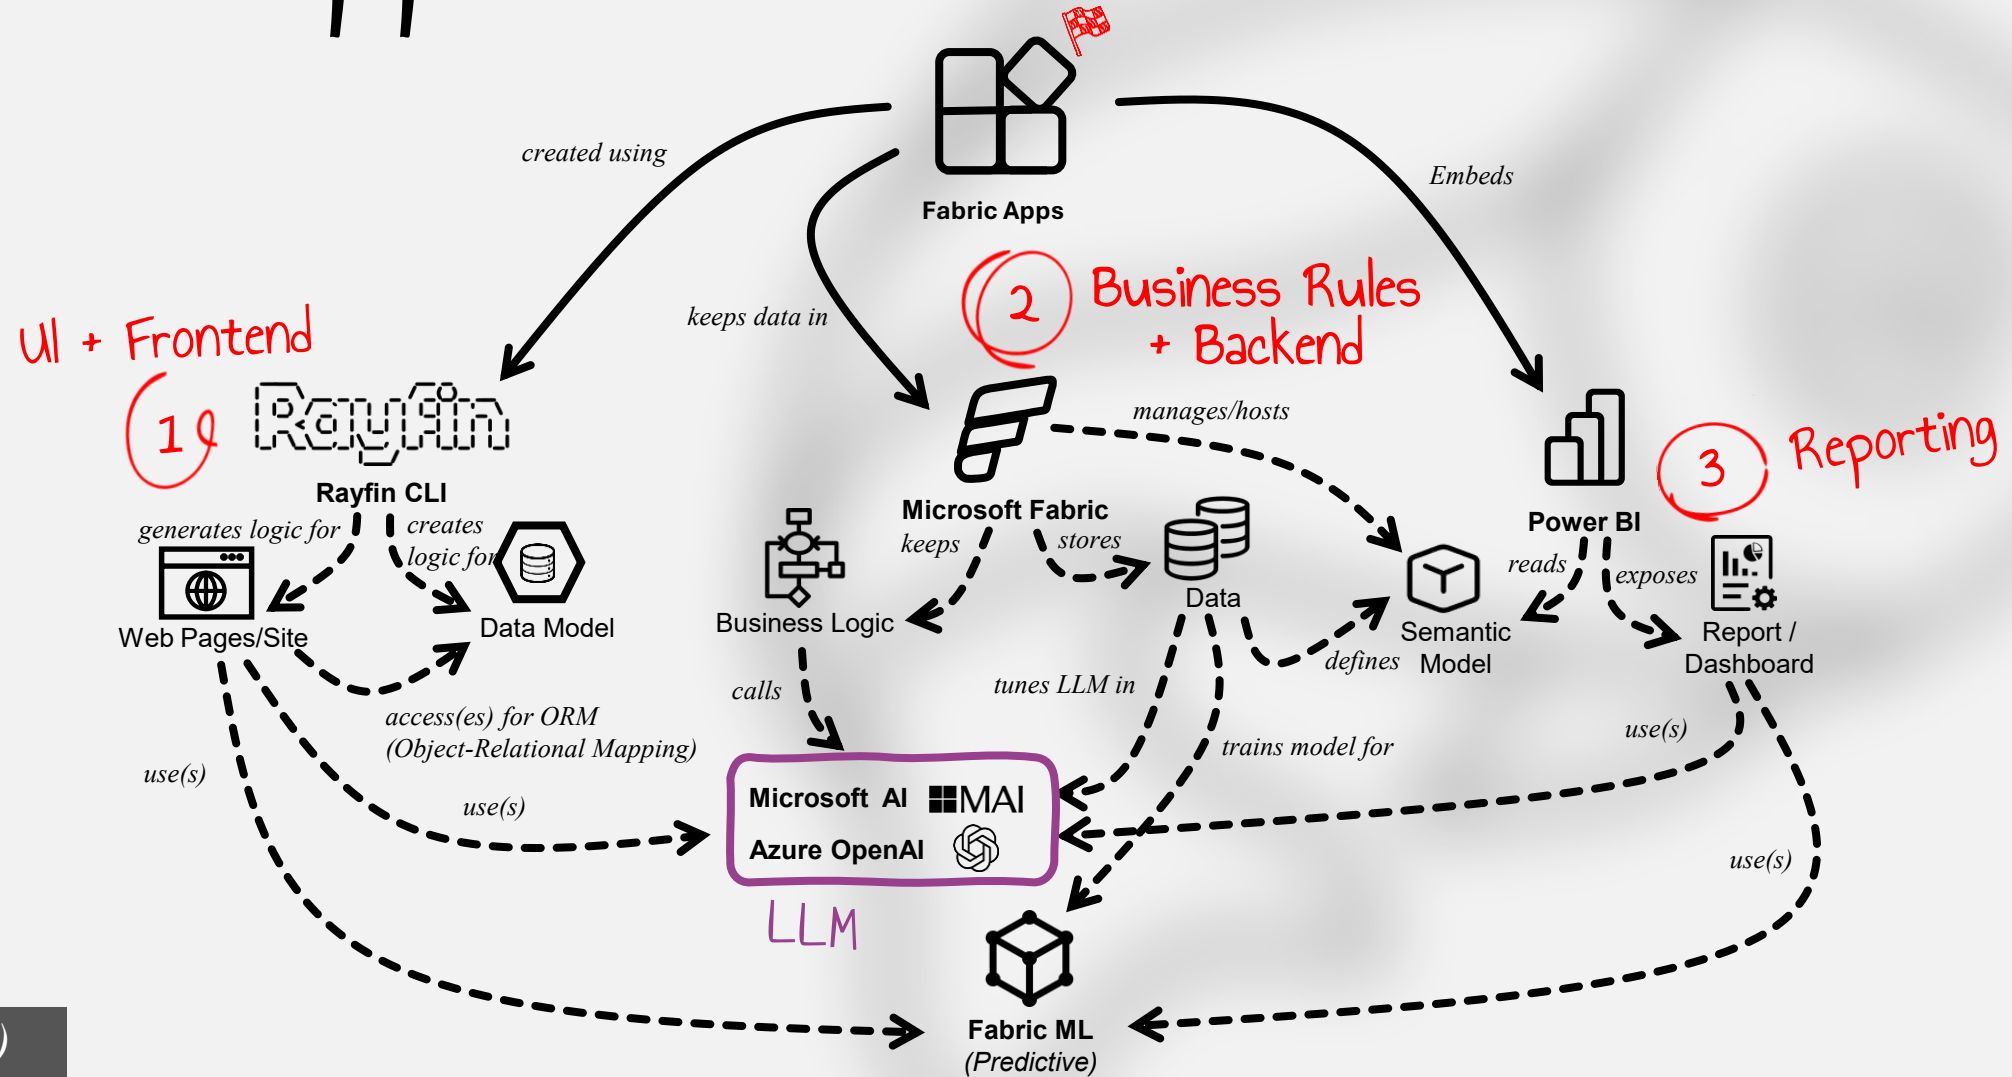

#Why #What #How

Fabric Apps

- 4. Absolves users from accessing individual artifacts ←
- 5. Allow multiple items to presented from one view ←
- 6. Uses security already defined in Microsoft Fabric ←
